Where the Women Propose. In the Ukraine, Russia, the woman does all

the courting. When she falls in love with a

man she goes to his house and informs him o the state of her feelings. If he reciprocates all is well, and the formal marriage is duly arranged. If, however, he is unwilling, she remains there, hoping to coax him to a better frame of mind. The poor fellow cannot treat her with the least discourtesy, nor has he the consolation of teing able to turn her out, as her friends in such a case would feel bound o avenge the insult. His remedy, therefore, if determined not to marry her, is to leave his home and stay away as long as she is in it. On the Isthmus of Darien either sex can do
the courting, with the natural result that almost every one gets married. A similar practice to that in the Ukraine exists among the Zuni tribe of Indians. The woman does all the courting, and also controls the situation after marriage. To her belong all the children, and descent, including inheritance, is also on her side. The same custom prevalls among the Vigrees, a tribe in Cabul, and the Nairs of Malabar. Among the Garo race of Abssam, in Northeast India, it is not only the privilege but even the duty of the girl bere to speak first.

It has generally been considered that whith foxskins were of the same mythical nature a schickens' teeth, but a Vancouver furrier was exhibiting a short time ago what he claimed were the palts of five white foxes. The man is an expert naturalist, and has been dealing in furs in the Northwest for forty years. He says these are the first white foxes he ever heard of, but he is absolutely sure the pelts are genuine foxskins. The conformation has been carefully preserved, and the big brush is, of course, attached. The fur is snow white, spotless and beautifully soft. The furrier bought them from a seal hunter, who caught the foxes at the last station to the north of Eastern Siberia, several hun-
